

Q4 2024 Business Performance Report

TechNova Inc. · Prepared by: Analytics & Strategy Division · January 2025

Executive Summary

TechNova Inc. closed Q4 2024 with a record quarterly revenue of **\$16.2 million**, representing a **23% increase** over Q3 2024 and a **41% year-on-year growth**. This strong performance was driven by robust demand across all three product lines — **CloudSuite**, **DataEdge**, and **SecureVault** — alongside an expanded geographic footprint with North America contributing the highest deal volume at 47 closed deals.

The quarter was also marked by a significant improvement in customer satisfaction, with the Net Promoter Score (NPS) rising from 62 in Week 1 to 81 by Week 13, surpassing the internal target of 70. Churn rate declined to 2.1%, a 0.4 percentage point improvement versus Q3, reflecting the impact of new onboarding and customer success initiatives rolled out in October.

Key Highlights

- **Revenue:** \$16.2M total Q4 revenue — CloudSuite (\$16.1M cumulative), DataEdge (\$10.4M), SecureVault (\$7.0M).
- **Deals Closed:** 128 new customers across all regions; North America led with 47 deals, followed by APAC (34) and EMEA (28).
- **Average Deal Size:** \$127K, up 11% from Q3, reflecting successful upsell motions.
- **NPS Score:** Ended Q4 at 81 — highest in company history.
- **Churn Rate:** 2.1%, down from 2.5% in Q3 — target is 1.8% by Q2 2025.
- **Pipeline Coverage:** Q1 2025 pipeline stands at 3.4x quota, providing strong visibility.

Strategic Context

The Q4 results validate TechNova's strategic pivot toward mid-market enterprise customers initiated in Q2 2024. The addition of 12 new channel partners in APAC and LATAM contributed to a 28% increase in inbound pipeline from those regions. The **SecureVault** product line, launched in Q2 2024, has achieved profitability ahead of the 18-month target, with gross margin reaching 71% in December.

Looking into Q1 2025, the company will focus on three priorities: accelerating the enterprise motion for CloudSuite, launching DataEdge 3.0 with AI-native capabilities, and expanding the customer success team to protect and grow the installed base. A detailed operational plan and budget allocation will be reviewed at the January All-Hands meeting.

Q4 Revenue by Product Line (\$M)

Product	Oct	Nov	Dec	Q4 Total	QoQ Growth
CloudSuite	\$4.2M	\$5.1M	\$6.8M	\$16.1M	▲ 26%

DataEdge	\$2.9M	\$3.4M	\$4.1M	\$10.4M	▲ 21%
SecureVault	\$1.8M	\$2.2M	\$3.0M	\$7.0M	▲ 28%
Total	\$8.9M	\$10.7M	\$13.9M	\$33.5M*	▲ 23%

* Cumulative figure includes multi-year contract recognition; single-year Q4 ARR = \$16.2M.

Performance Dashboard — Visual Overview

Section 2 · Data Visualization · Q4 2024

Q4 2024 Dashboard

The dashboard below consolidates all key Q4 metrics into a single visual view. Each panel corresponds to a distinct performance dimension discussed in this report. Refer to Section 3 for the detailed textual analysis of each metric.

Figure 1: TechNova Q4 2024 Business Performance Dashboard. Panels (left to right, top to bottom): Monthly revenue by product (grouped bar), Cumulative revenue growth (stacked area), Q4 revenue share (pie), Customer NPS trend (line), Deals closed by region (horizontal bar), Q4 KPI summary tile.

How to Read This Dashboard

- **Top-left bar chart:** Shows month-by-month revenue for each product. December was the strongest month across all three lines.
- **Top-centre stacked area:** Illustrates compounding revenue growth week-by-week; the steeper the slope, the higher the weekly close rate.
- **Top-right pie chart:** CloudSuite commands ~48% of Q4 revenue share, consistent with its position as the flagship product.
- **Bottom-left NPS line:** The orange dashed line marks the 70-point target; TechNova crossed this in Week 7 and maintained an upward trend.
- **Bottom-centre horizontal bar:** North America remains the largest region; LATAM shows the highest growth potential at 19 deals from a lower base.
- **Bottom-right KPI tiles:** At-a-glance summary of the four executive-level metrics with quarter-over-quarter delta indicators.

Detailed Analysis & Q1 2025 Outlook

Section 3 · Strategic Insights · Prepared: January 2025

Product Performance Analysis

CloudSuite

CloudSuite delivered \$16.1M in Q4, up 26% quarter-on-quarter. Growth was primarily driven by the BFSI and healthcare verticals, which together contributed 58% of CloudSuite bookings. The December surge to \$6.8M reflects end-of-year budget flush purchasing patterns common in enterprise accounts. Win rate against primary competitor NimbusTech improved from 44% in Q3 to 51% in Q4, largely attributable to the new compliance module released in October.

DataEdge

DataEdge achieved \$10.4M in Q4, growing 21% QoQ. The product added 43 new logos, the highest single-quarter new logo count in its history. The upcoming DataEdge 3.0 release (targeted Q1 2025) has generated significant inbound interest, with 67 existing customers already registered for the early access programme. Average contract length extended to 26 months in Q4, up from 19 months in Q3, indicating growing customer confidence in the platform roadmap.

SecureVault

SecureVault, TechNova's newest product, reached \$7.0M in Q4 — its first full quarter achieving EBITDA-positive status at 71% gross margin. The product has benefited from heightened enterprise focus on data security post the global regulatory updates in H2 2024. Pipeline coverage for SecureVault in Q1 2025 stands at 4.1x, the highest of any product, suggesting strong momentum heading into the new year.

Regional Breakdown

Region	Deals Closed	Revenue (\$M)	Avg Deal (\$K)	Top Product
North America	47	\$7.2M	\$153K	CloudSuite
APAC	34	\$4.8M	\$141K	DataEdge
EMEA	28	\$2.9M	\$104K	CloudSuite
LATAM	19	\$1.3M	\$68K	SecureVault

Q1 2025 Outlook & Priorities

Based on current pipeline data and market signals, the Analytics team projects Q1 2025 revenue in the range of **\$18.5M – \$20.0M**, representing 14–23% sequential growth. Key assumptions underlying this forecast include conversion of 38 late-stage

enterprise opportunities (\$4.2M combined ACV), continued momentum in APAC driven by three new channel partners, and the contribution of DataEdge 3.0 early-access customers converting to paid contracts in March.

- **Priority 1 — Enterprise Expansion:** Activate 5 strategic accounts identified by the sales team as expansion-ready with >\$500K upsell potential each.
- **Priority 2 — DataEdge 3.0 Launch:** Execute GA release by Feb 28; ensure support readiness and partner enablement completed by Feb 15.
- **Priority 3 — LATAM Growth:** Onboard 3 new channel partners by end of January; set Q1 target of 28 deals (vs 19 in Q4).
- **Priority 4 — NPS Defence:** Maintain NPS above 78 through proactive CSM outreach cadence for all accounts >\$100K ACV.

Key Risks & Mitigations

Risk	Likelihood	Impact	Mitigation
DataEdge 3.0 delay	Medium	High	Parallel dev tracks; weekly release check-ins
APAC macro headwinds	Low	Medium	Diversify to 2 new sub-regions (SEA, ANZ)
Competitor price war	Medium	Medium	Accelerate compliance module differentiation
Key talent attrition	Low	High	Retention bonuses issued Nov 2024; hiring buffer
